

Copyright vs. Community in the Age of Computer Networks

Richard Stallman, Free Software Foundation

Copyright developed in the age of the printing press, and was designed to fit with the system of centralized copying imposed by the printing press. But the copyright system does not fit well with computer networks, and only draconian punishments can enforce it.

The global corporations that profit from copyright are lobbying for draconian punishments, and to increase their copyright powers, while suppressing public access to technology. But if we seriously hope to serve the only legitimate purpose of copyright—to promote progress, for the benefit of the public—then we must make changes in the other direction.

**When: Monday, April 2, 2012
1:00 p.m.**

**Where: Assembly Hall
International House
1414 East 59th Street
Chicago, IL 60637**

*Persons with disabilities who may need assistance should contact the Office of Programs & External Relations in advance of the program at 773-753-2274

This seminar is brought to you by:

The Computer Science Department
